

Getting started with Gemini in Vertex AI

Introduction

- Experience in Analytics, MLOPs and data engineering
- Enthusiastic learner and tech community contributor

**AI WILL NOT
REPLACE YOU
IN YOUR JOB,
SOMEONE
WHO USES AI
WILL**

Agenda

Vertex AI 100

Gemini Era

Use cases

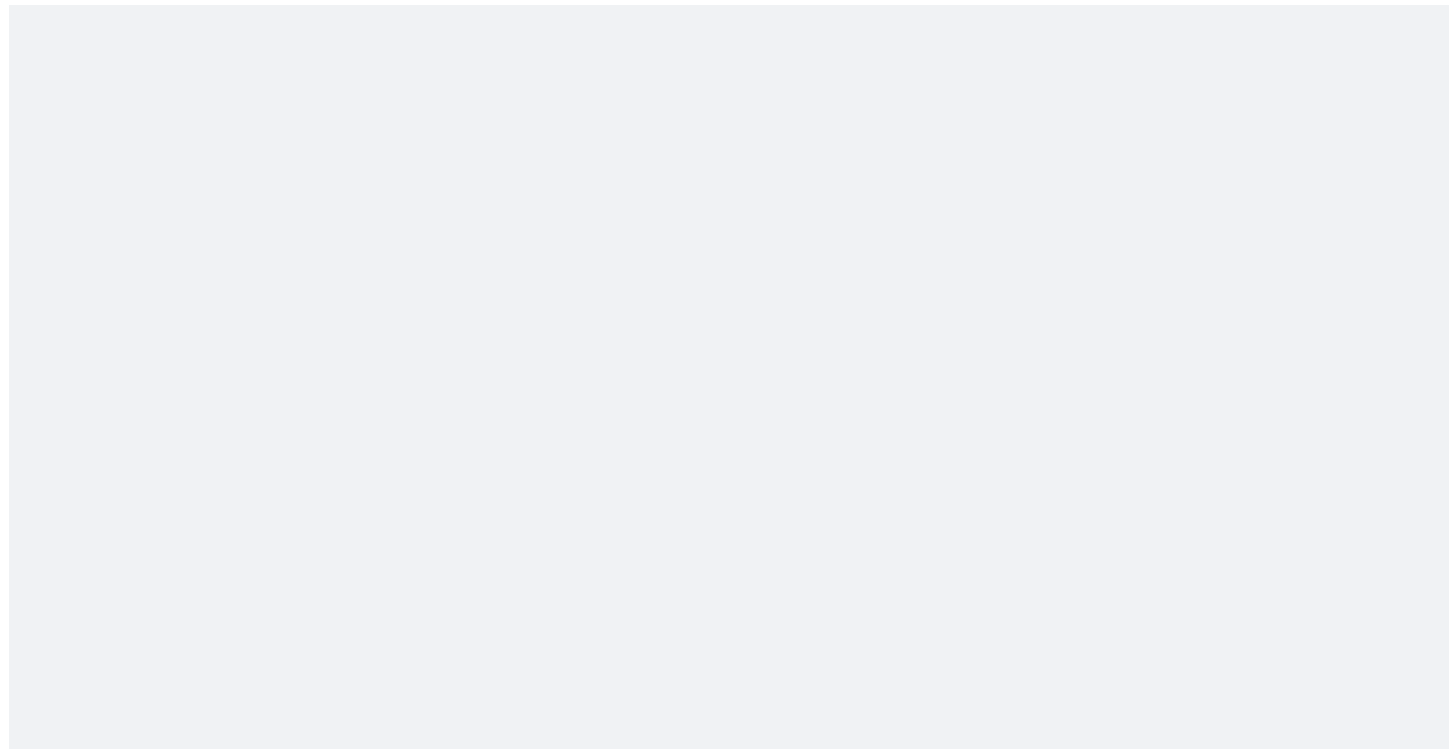

Next Steps

Target Audience:

Level: Beginner

The session is intended for all and beginners who are new to Vertex AI.

The Era of Gen AI

Generative AI

AI that generates content for you

Text

Code

Image

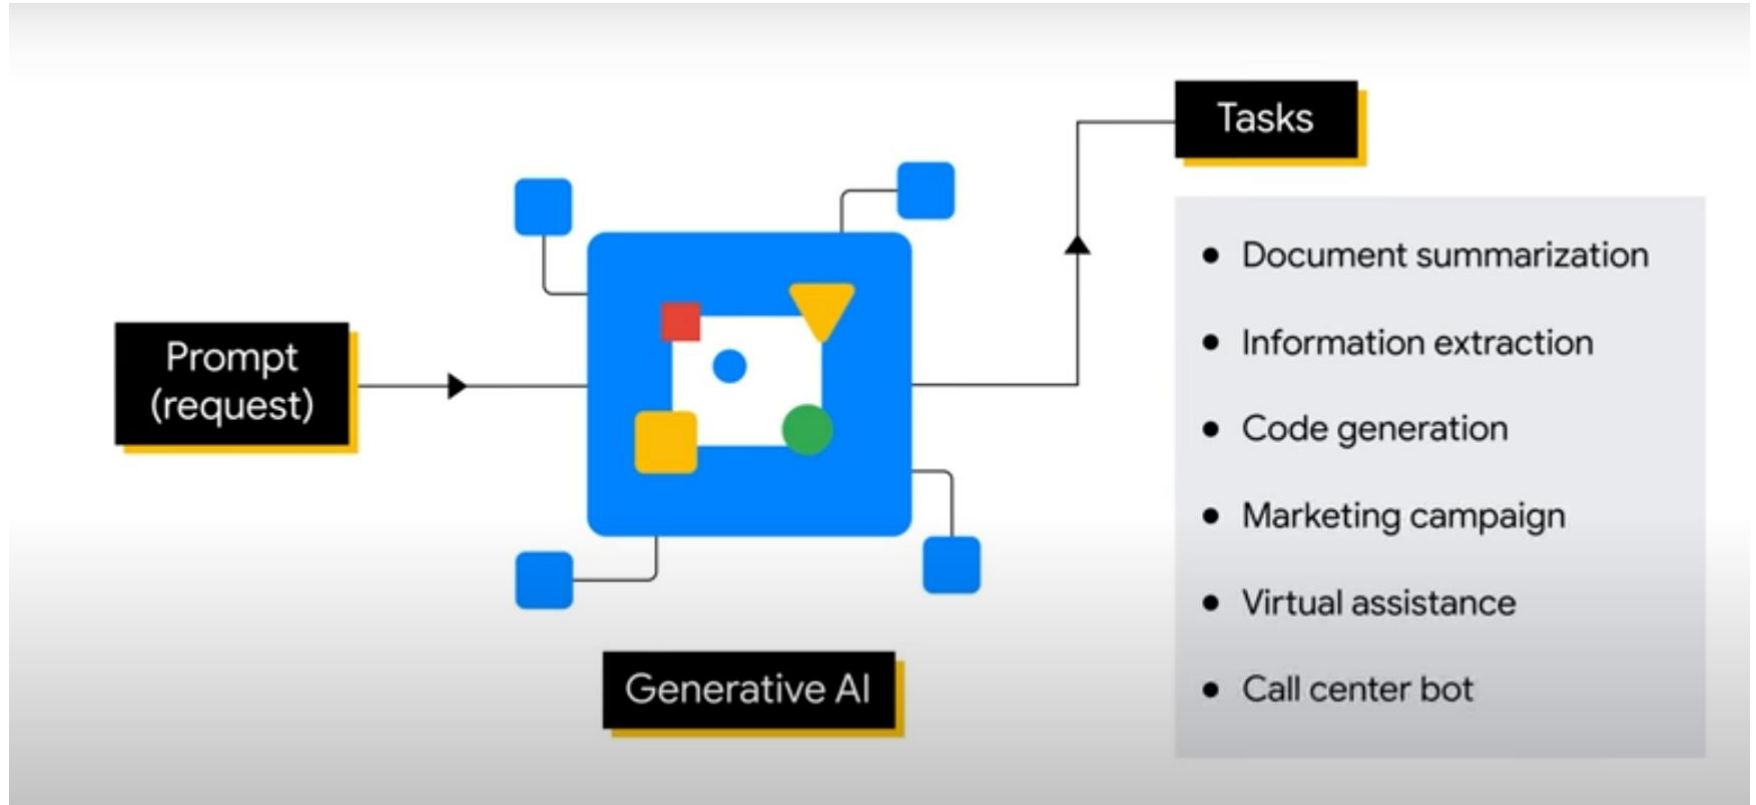

Speech

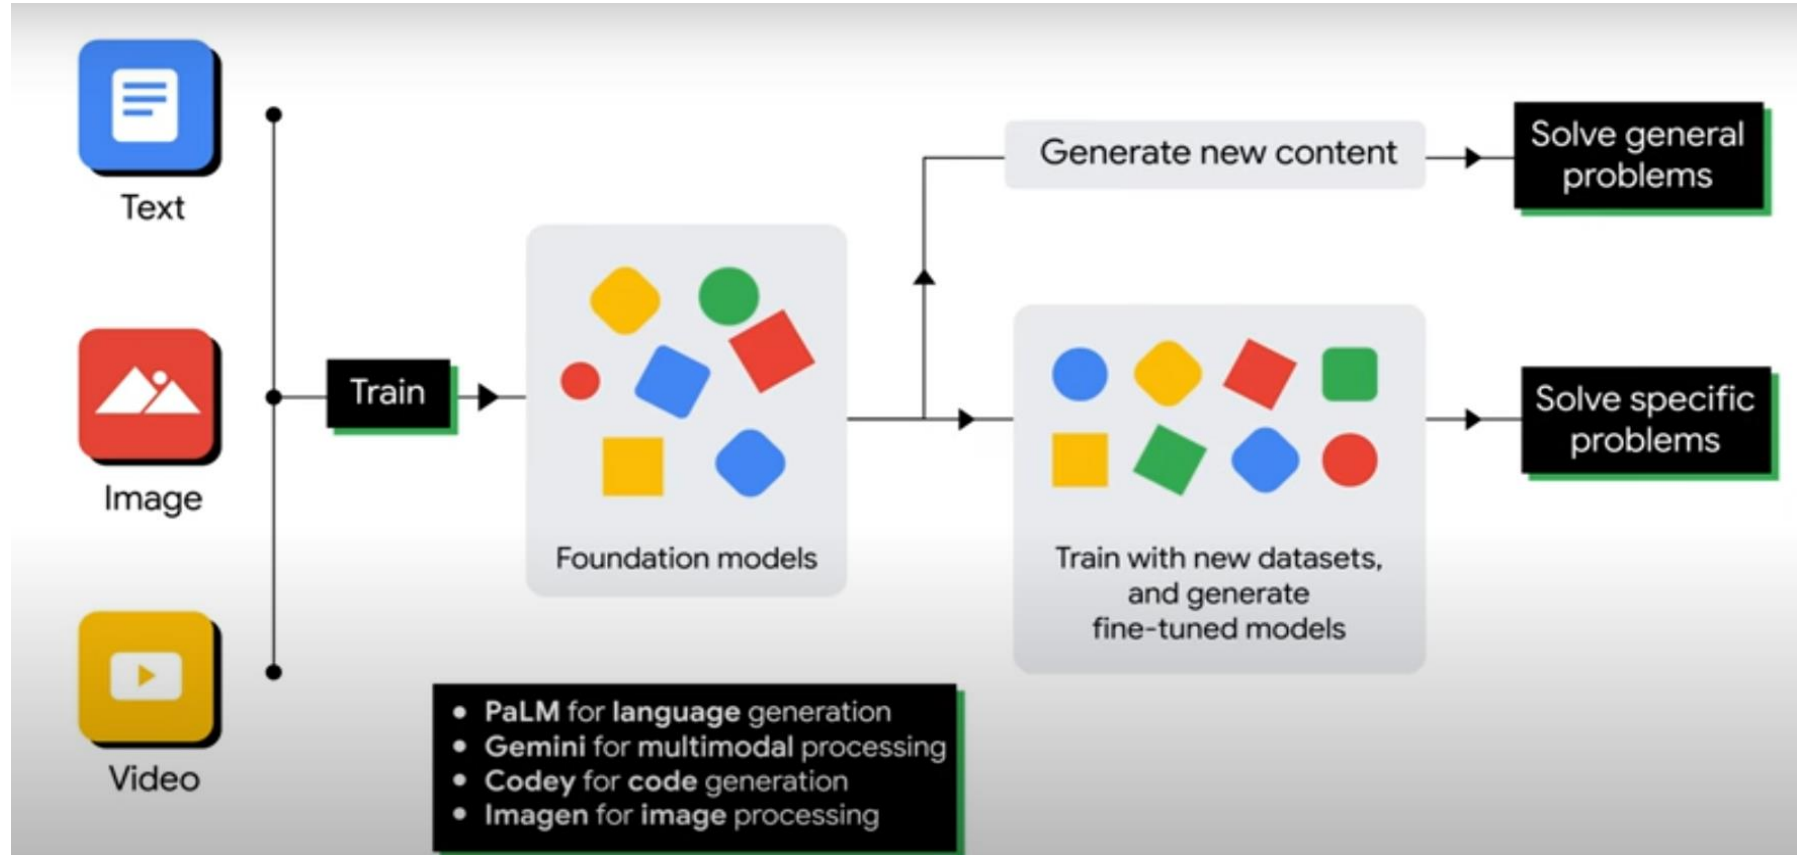

Video

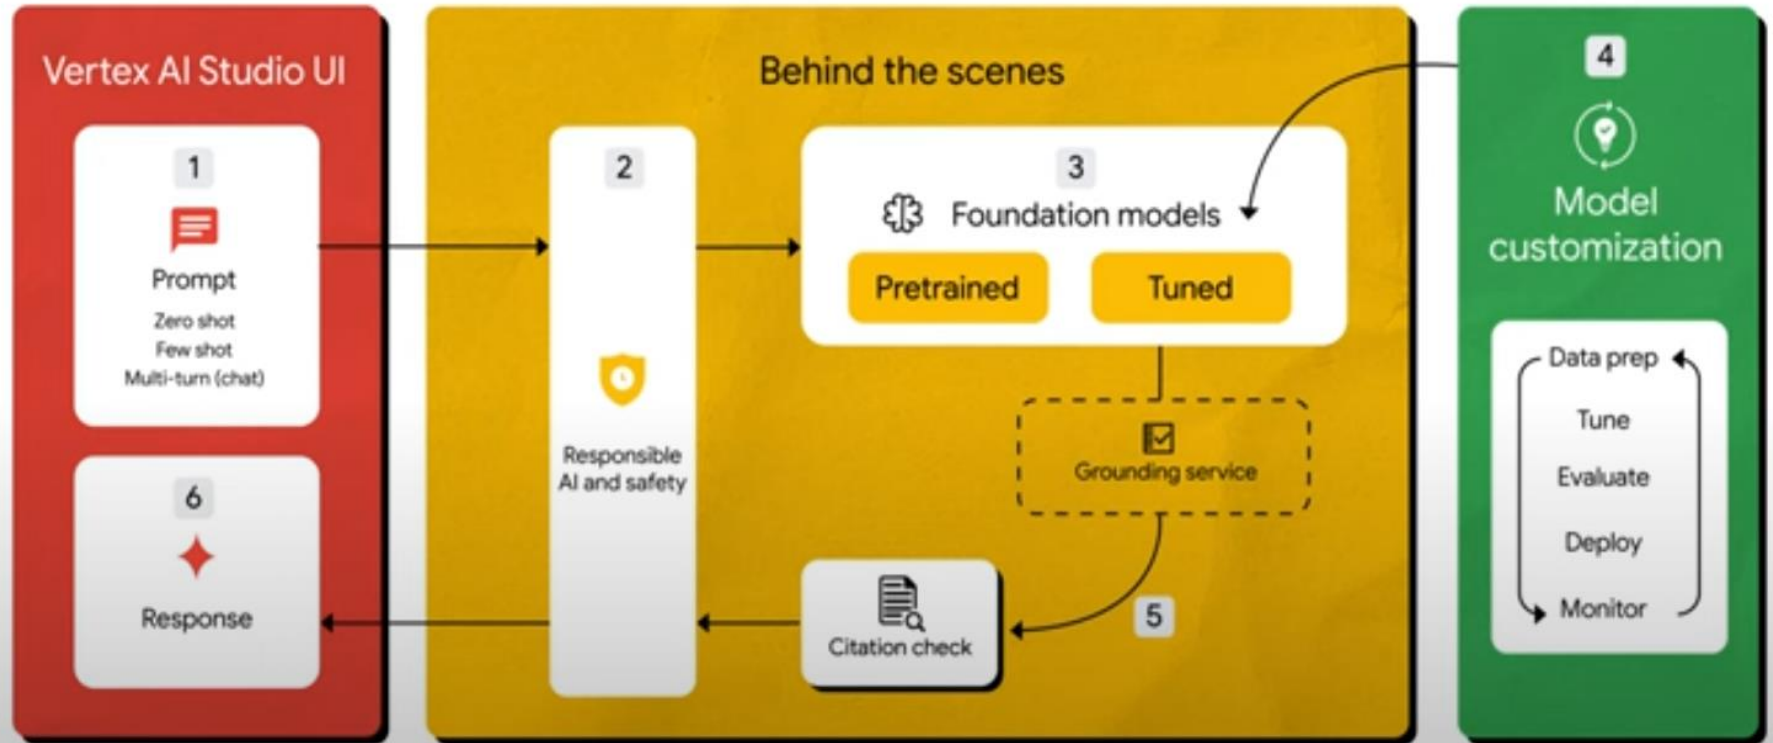

Overview

Architecture

Generative AI workflow

Vertex AI Platform

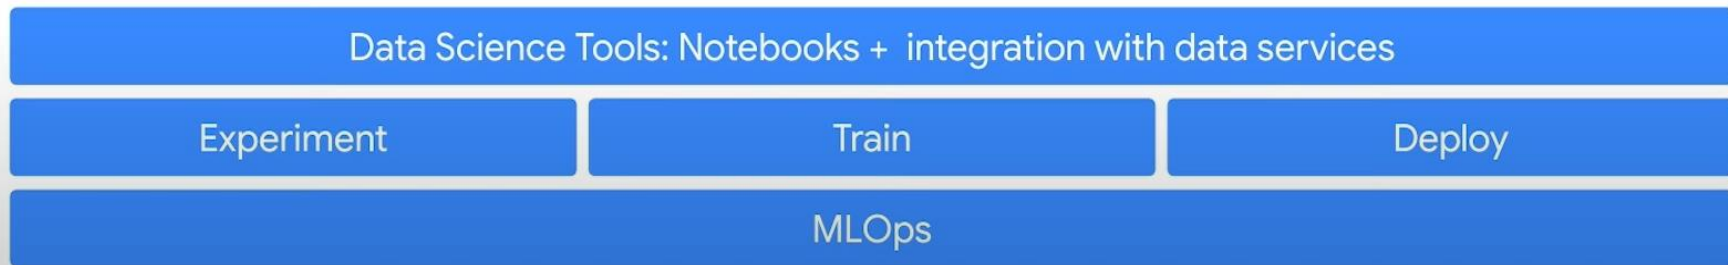

Vertex AI: Discover, build, experiment, deploy, and manage ML models

GenAI

ML Platform

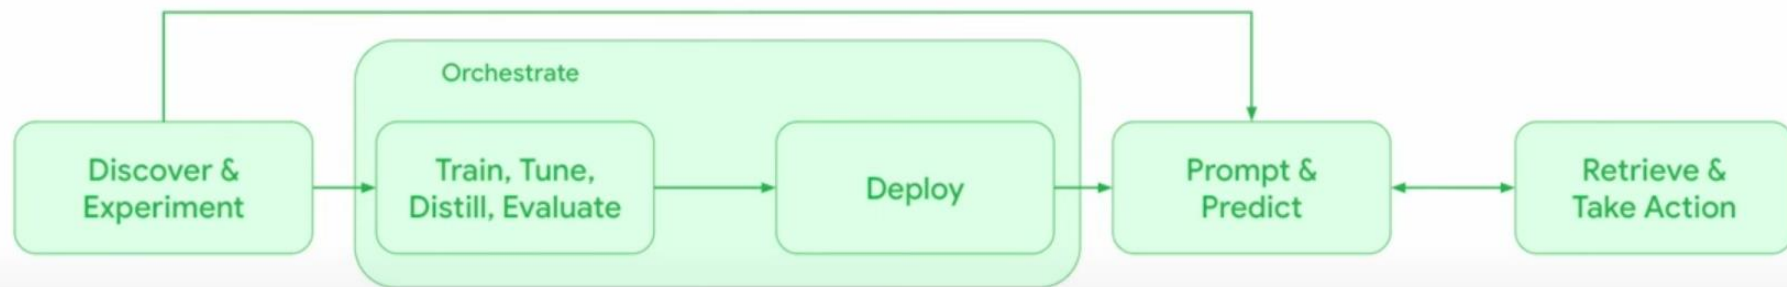

MLOps for Gen AI

Evaluate & Monitor

Customize & Train

Serve

Connect

Govern Data & Artifacts

Curate Data

Vertex AI Studio

Primary tool to access Google's Generative AI models

Test

Tune

Augment

Deploy

Vertex AI Studio

Multimodal

Process data in multiple modalities like image, video, and text

- Perform multimodal tasks

Language

Generate text and tune models

- Design prompts for different tasks
- Create conversations
- Tune and deploy a language model

Vision

Generate images based on prompts

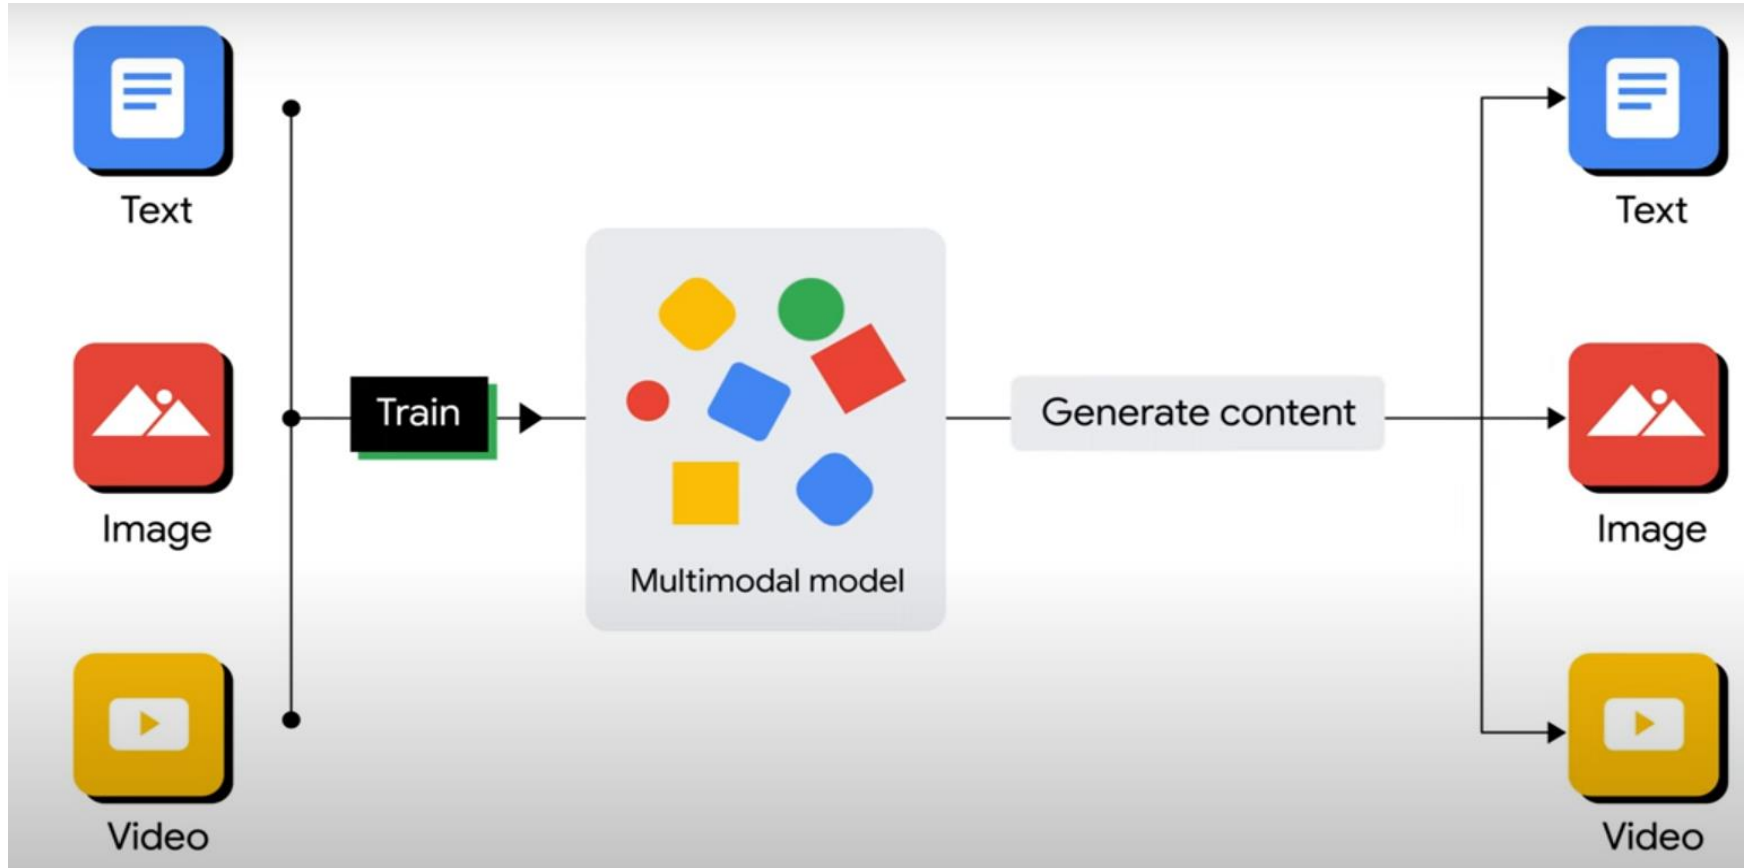

- Generate images
- Edit images

Speech

Generate text or speech

- Generate text from speech
- Generate speech from text

Multi Modal

Use cases

Description and captioning

Identifying the objects and describing them

Information extraction

Reading text from images and videos

Information analysis

Analyzing the images and videos based on prompts

Information seeking

Answering questions or generating Q&A

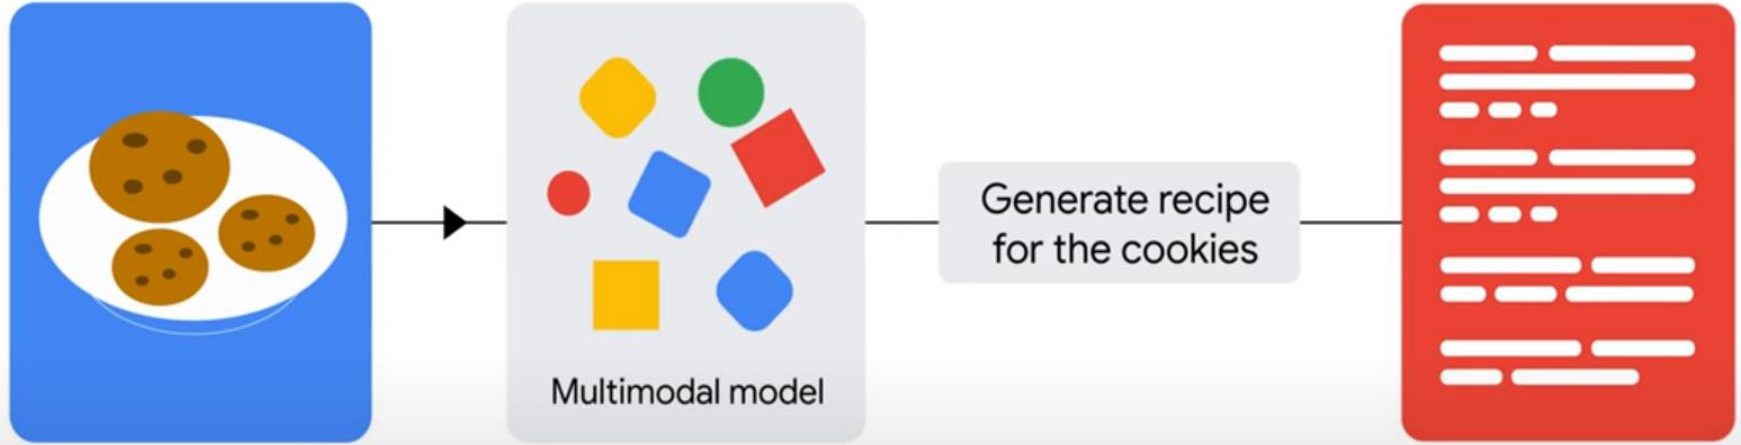

Content creation

Generating a story or advertisement

Data conversion

Converting text responses in formats like JSON

Multi Modal

Gemini

Gemini Models

Gemini – Ways to Interreact

User interface (UI)

Using a UI with Google
Cloud console (no-code)

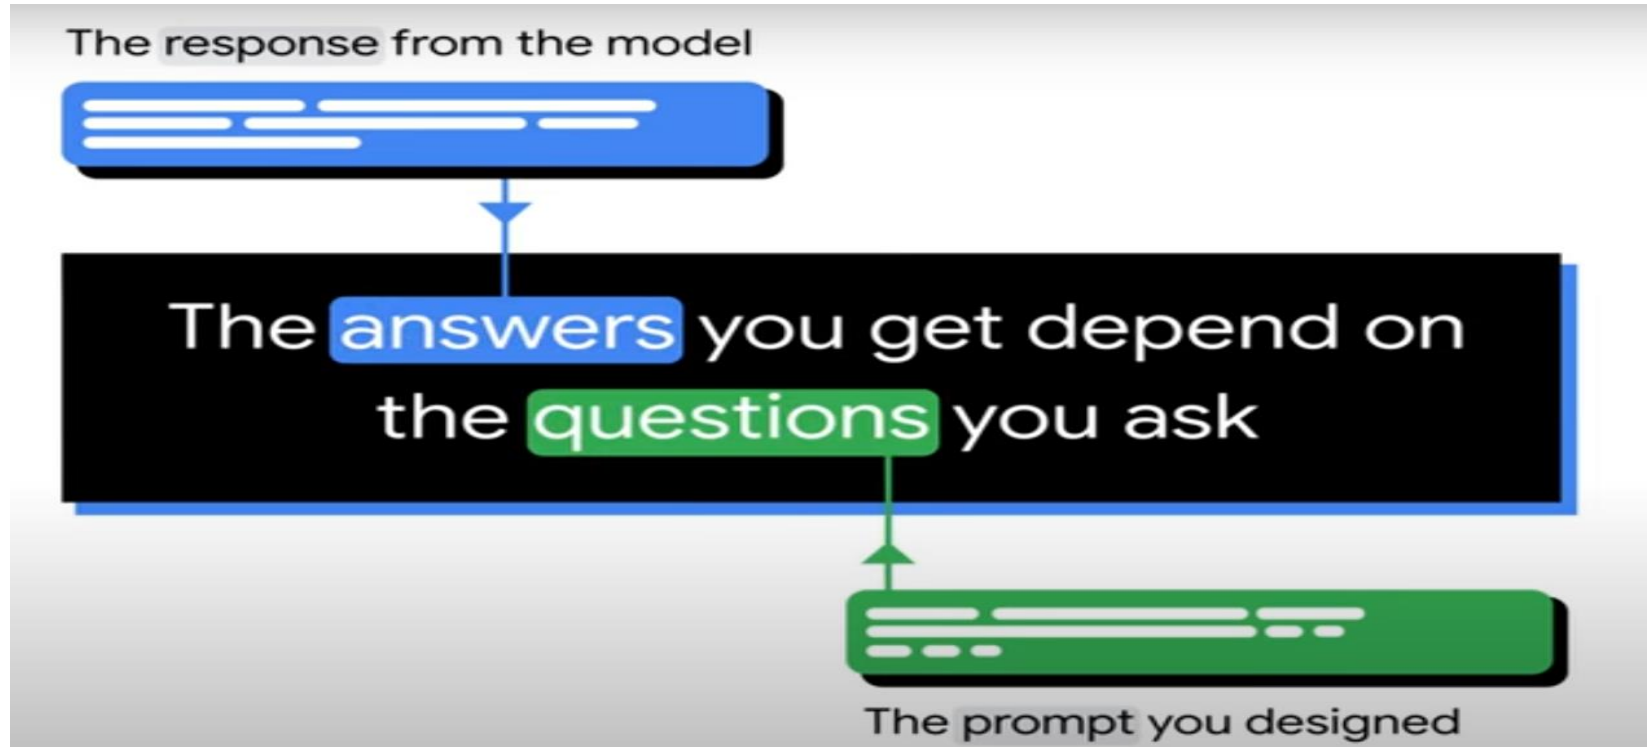

SDKs

Using SDKs with a
notebook (in Python/Java)

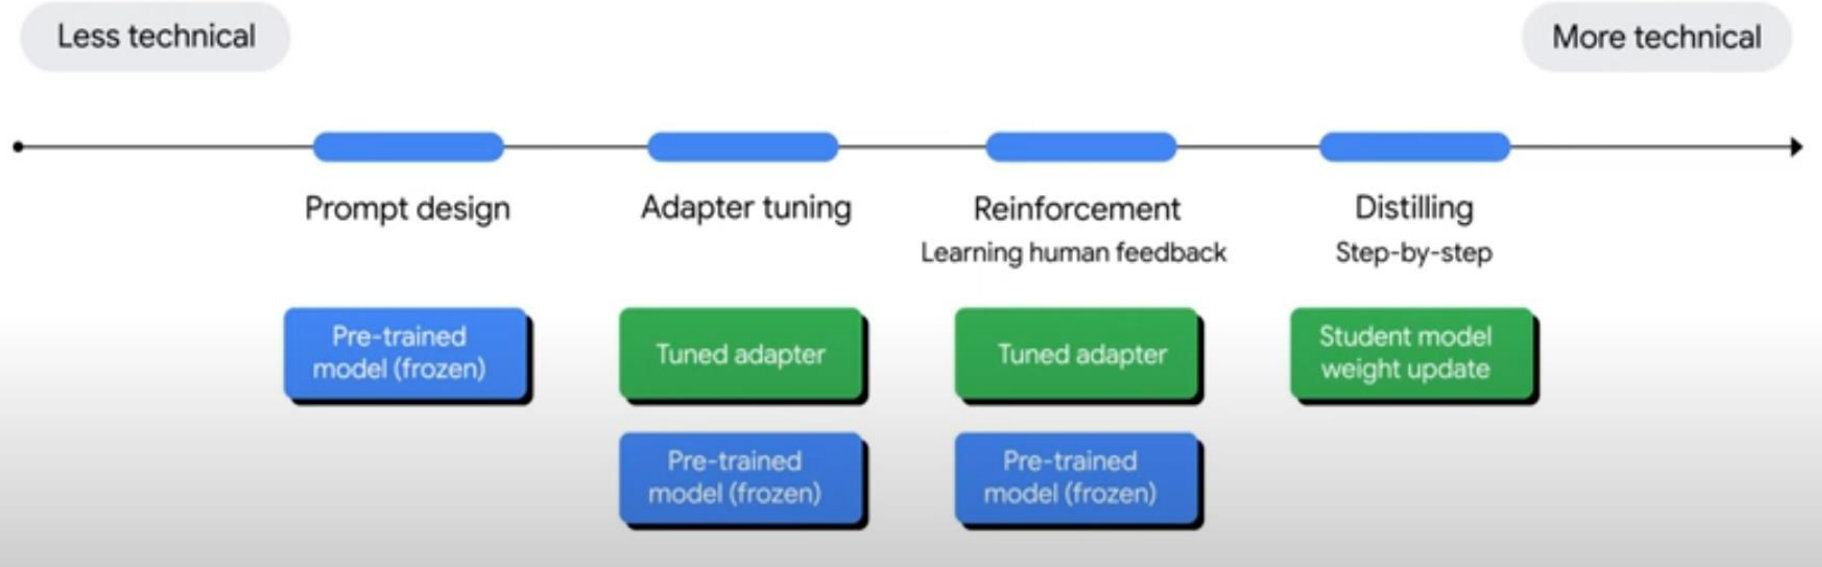

APIs

Using APIs with
command-line tools

Prompt Design

Customize & Tune a Gen AI model

Enterprise Readiness

Consumer

Plan a 3-day trip to Patagonia

Create a valentine poem

Generate a picture of a panda playing yahtzee

Enterprise

How do we **control** our data?

How will we manage **costs**?

How to ensure data **accuracy** and **security**?

Data governance and privacy

Security and compliance support

Reliability and sustainability

Responsible AI

You own and control your data, not Google
Security Controls with VPC-SC, CMEK, access transparency
Responsible AI tooling, enablement & support

Demo
