# **AI services across verticals and segments**

# Introduction

- Experience in Analytics, Reporting and data engineering
- Azure Dev Lead and Microsoft Certified - Azure and AI Engineer
- Enthusiastic learner and tech community contributor

## Navaneethan Gopal

Principal Data Scientist @ Ingram Micro

[LinkedIn](https://www.linkedin.com/in/navaneethan-gopal-9b101612/) – <https://www.linkedin.com/in/navaneethan-gopal-9b101612/>

[Twitter](https://twitter.com/NavaneethhGopal) – <https://twitter.com/NavaneethhGopal>

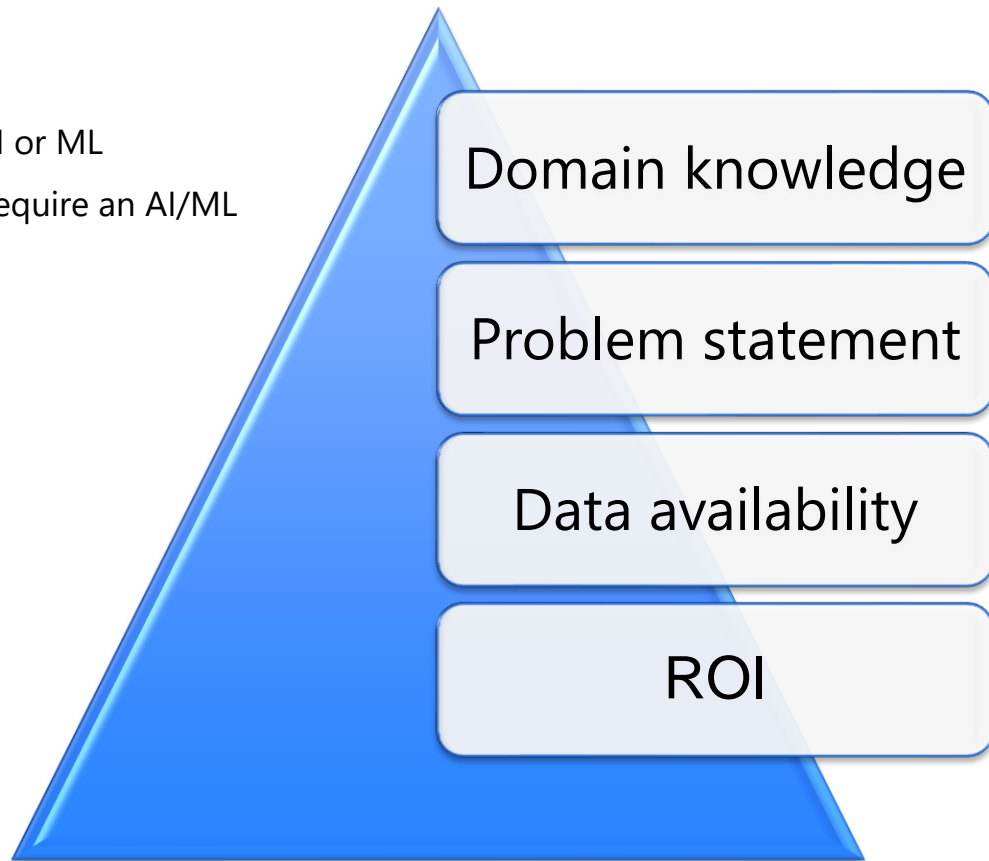

**Simplicity is always best**

# Starting points

- Do you really need AI or ML
- Does your problem require an AI/ML

# Agenda

Welcome Note

Azure Cognitive  
services - Speech

Azure Video  
Indexer

Case study

Resources

## **Target Audience:**

Level: Beginner

The session is intended for developers and beginners who are new to Azure Cloud, Machine Learning.

Azure account, Jupyter Notebook

# NPCs - non-player characters

# AI for Game development

- AI in gaming is about creating more responsive, adaptive & challenging games using artificial intelligence.
  - NPCs
  - Path Finding
  - Decision Making
  - Content Generation
  - Deterministic/ Non-Deterministic techniques
- **Benefits**
    - Smarter & More realistic
    - Save time & Cost
    - Ease of using
    - Eliminates predictability

# Azure speech AI

- We can build voice-enabled apps confidently and quickly with the Speech SDK
- Its easy for us to transcribe speech to text (STT) with high accuracy, produce natural-sounding text-to-speech (TTS) voices, and translate spoken audio.
- Translate speech in real-time
- Verify & recognize speakers
- Use Speech services to convert voice to text and continue text Analytics

# Why Microsoft Cognitive Services ?

## Easy

Roll your own with REST APIs  
Simple to add just a few lines  
of code required

## Flexible

Make the same API code call on  
iOS, Android, and Windows  
Integrate into the language  
and platform of your choice

## Tested

Built by experts in their field from  
Microsoft Research, Bing, and Azure  
Machine Learning  
Quality documentation, sample code,  
and community support

# Azure Cognitive Services

- Azure pre-trained AI Services provide ready-made intelligence for your applications and workflows.
- AI Services easily integrate with your applications to address common use cases such as personalized recommendations, modernizing your contact centre, improving safety and security, and increasing customer engagement.
- AI Services on Azure don't require machine learning experience

# Open for Q&A

#Azure Developer Community

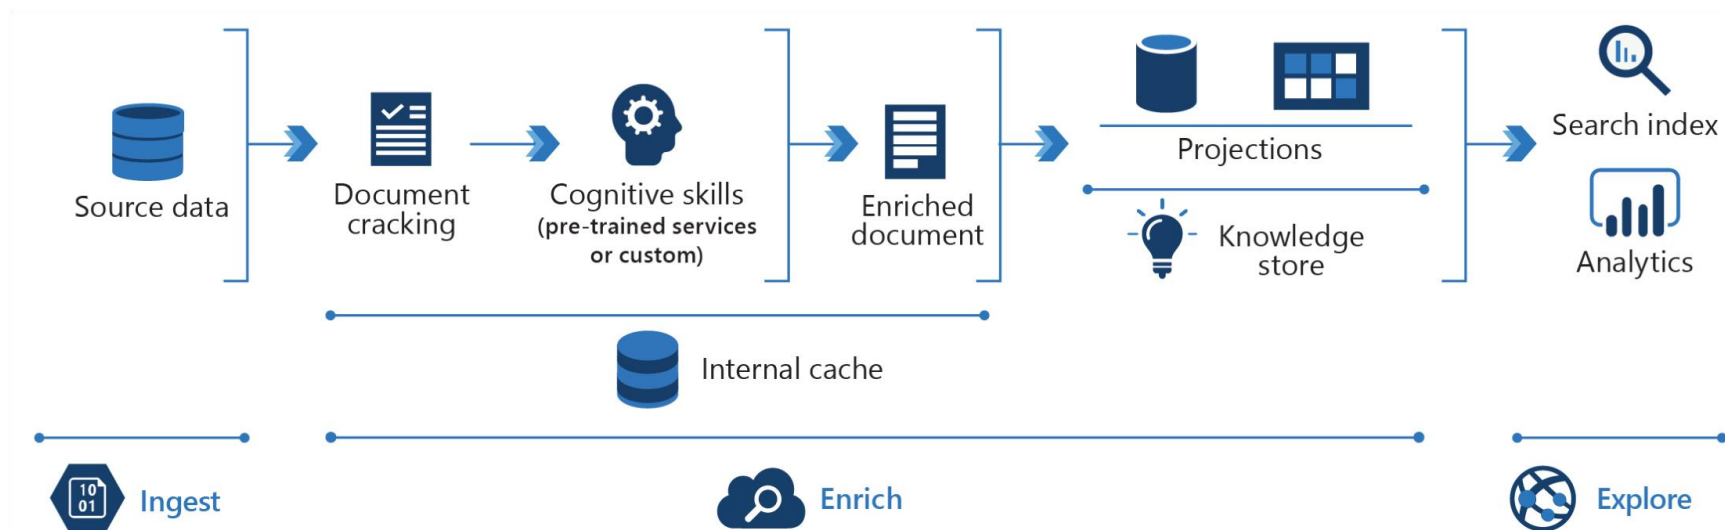

## Thank you!!

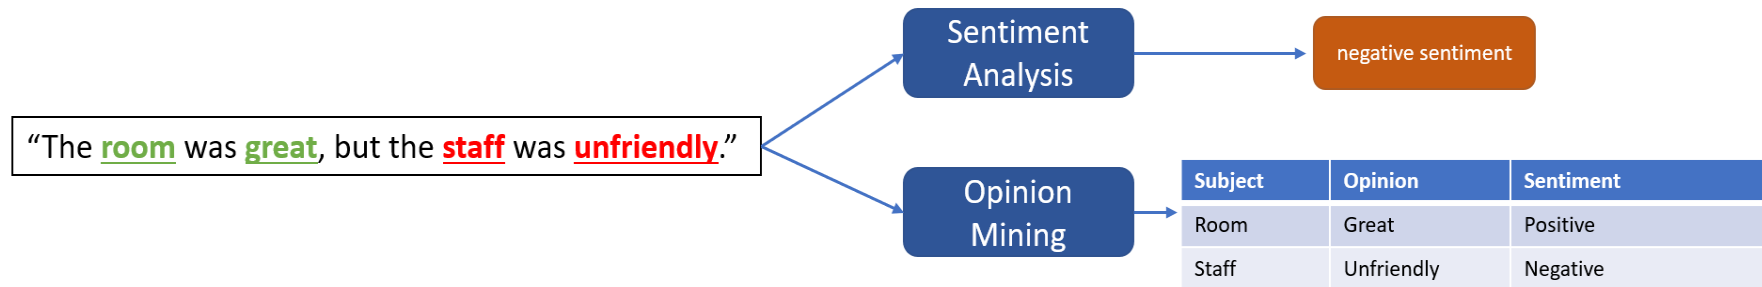

# Power of Artificial Intelligence

# Architecture

# Sentiment Analysis Vs Opinion Mining

# Customer Feedback Analysis

- Track Customer Sentiment
- Determine which Customer segments have the strongest opinions
- Plan product improvements
- Determine the effective communication channels
- Prioritize the customer service issues
- Create a benchmark on customer satisfaction, ease of doing business.
